**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,699,115 in view of Crevasse et al. U.S. Patent No. 6,699,115 teaches all the limitations of the claims except for the apparatus comprising a polishing pad support, which is a rotatable platen, a rotatable carrier head to hold the substrate against the polishing surface, and a dispenser to supply a slurry to the polishing surface. Crevasse et al. teaches a rotatable platen, 140, a rotatable carrier head, 110, and a dispenser, 167, for supplying a slurry. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the polishing system of Crevasse with the presently claimed polishing pad, in order to enhance the polishing capabilities.
